

Ricmotech Phone Cradle for Thrustmaster Installation Guide

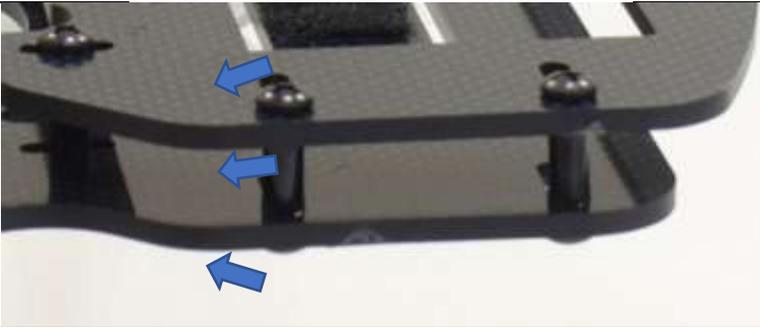

Items Needed:

1. Thrustmaster TX, T300, TS-PC or TS-XW wheel base
2. Contents of cradle Kit
 - a. Back plate
 - b. Front Bezel
 - c. Three sets of six spacers
 - d. Twelve #6 x 0.25" screws
 - e. Four #6 washers
 - f. Felt pads
3. Phillips Screwdrivers (#1 and #2)

Installation:

	<p>Locate six spacers that are as tall or slightly taller than the highest point on your phone.</p>
	<p>Assemble the spacers from above with 2 screws for each as shown here.</p>
	<p>The assembled cradle should look like this. The felt pads should only be used if there is excess gap in the slot as shown in the next step. The pads can be applied wherever needed.</p>

If there is excess gap in the phone slot use the felt pad(s) to keep the phone against the front panel. This is especially required when a camera protrudes on the back of the phone.

Place your phone in the cradle and adjust screws and spacers to locate your phone screen centered in the opening.

Remove the wheel from your Thrustmaster base. Then remove the retaining screw off the QR collar and the four screws that secure the "nose cone".

Secure the phone cradle using the four original screws and the four washers provided with the kit as shown here. Reinstall the steering wheel and secure with the retaining screw.

Run your favorite dashboard app on your phone and drop the phone into the cradle.

Most phones have the charging port in a position that is accessible while the phone is in the cradle.

For Beta Testers

Ricmotech is not able to provide support for any app that runs on your phone and connects to a game. We only provide the mounting cradle. There are many apps available for PC and console games and we do not endorse any of them.

Need Help?

If you run into any problems during the installation of the cradle please contact us directly at tech support at (305) 417-9241 or via email at support@ricmotech.com.

Due to constant improvements to our products, the product you receive may vary slightly from the product shown in the illustrations.
